

Corporate Training "On-Site" - Domestic US

Industrial Facilities ■ Telephone Companies ■ Information Technology Users

Financial Institutions ■ Government ■ Healthcare Facilities

High Tech Equipment Damage, Outages, Upset a Problem? Let Us Train Your Personnel to Avoid Disasters...

- We now only offer **ON-SITE Seminars inclusive with a 2 or 3 day Investigation** into your problems and issues and then address your employees with the issues found and show them how to address and resolve them. This results in training seminars having a tailored and focused agenda to your companies individual circumstances and issues. **(Power & Grounding Issues / Solutions are Inter-related and are taught together.)**

This amounts to a full five-day week of working on-site with you and our travel time. (Example: 3-day investigation and a 1 "one-day seminar". Or a 2 day investigation with 2 "one day seminars" to allow more employees to attend. The 5th day is our packing and travel time to return or if transportation is readily available we can also spend most of this day on site as well.)

- **Fixed prices for an unlimited amount of employees, our travel expenses, investigation and multimedia presentation to your employees using your training facilities:** You provide training facilities, employee meals, coffee breaks etc, video projector or large screen TV, VHS player, you organize your internal attendance and provide us an assistant. We present a multimedia presentation via PowerPoint and unedited video of your issues and problems to bring home your issues to your employees. We provide instructor / consultant (one person) and hardware displays to relate to your power and /or grounding problems and issues to your chosen audience. We use PowerPoint 2000 and can use your system or our multimedia station.
- **Smaller classes, Q & A and direct airing of issues discovered allow direct interaction with consultant to address employees concerns about their problems and to help them better understand the issues involved. Result? Higher attention and retention levels and lower costs long-term. In addition, your employees have the benefit of working alongside our investigation consultant for the days prior to our presentation.**
- **Each Seminar on site is a full one-day** of each attendee's time. Seminars begin at 8 am. Lunch in seat with movie on Lightning - a copy presented to each attendee. Generous Q&A periods, each seminar adapted and individually structured to needs of client. Typical ending time is at end of employee's normal day and later for those who want to know more.

Seminars Currently Being Offered Direct:

\$11,995.00 for up to 14 attendees - \$16,995.00 for unlimited attendees - unless pilot course.

- **"Industrial Power & Grounding"** (Lightning protection for oil refineries, Process Control Industries, explosive materials protection (grounding), industrial controls protection, etc. Foxboro, Bailey, Yokogawa, Fischer). This includes power protection philosophy from high voltage to the PC. Pilot Seminars (until 7/2002) are \$9,995.00 (14 or less) \$13,995.00 for unlimited.
- **"Telecommunications Power & Grounding"** (From the subscriber's house to the Internet backbone - yes, this one was originally developed to address local telephone company issues - Nortel, Bellcore grounding, etc.)
- **"Healthcare Power & Grounding"** (Hospitals, High Tech Diagnostic Centers, etc, ICU's, Surgical Suites, Mobile Equipment - CT, MRI, Lithotripters, PET, Digital, X-Ray.)
- **"Information Technology Power & Grounding"** (LAN's, WAN's, Mainframes, Distributed Micro-processing, Multi-Building Facilities)
- **"Sensitive Electronic Systems Power & Grounding"** (How to achieve high uptime and reliability in hostile environments.)
